Wireless Fender™ Precision Bass™

for PlayStation®3

Mad Catz' officially licensed Wireless Fender Precision Bass Replica is the must-have bass guitar for every Rock Band enthusiast. The custom finish and strap both ensure your bass axe will look as good as the real thing on and off stage. With the premium-quality dual/split strum bar you can hit notes like never before. Its two-piece design allows for two-finger flicking like no other bass can offer, meaning the patent-pending technology provides the extra edge you need to excel in the game. A Whammy dial and an additional set of Fret Buttons for strum-free finger tapping allow the bass to double as a guitar, making it all you need to jam either role in-game. If you had to choose only one bass guitar for throwing down in Rock Band, this feature-rich Wireless Fender Precision Bass Replica from Mad Catz would be your only choice.
